

## Savantis : Enable

We are enablers and educators focused on helping you build and develop the internal capabilities and talent needed to successfully complete SAP projects, or to support and to enhance your SAP footprint independently.

Our Mission is to become true partners with our customers and team members, being focused on the same objectives that they are focused on — efficiency and competitiveness.

No matter where you are in the SAP lifecycle, we can offer you value-added capabilities.

### SAP Training.

Training and educating your workforce with the right SAP knowledge and skills they need to meet your strategic goals is a crucial factor in achieving system proficiency, acceptance and a rapid return on your ERP investment. Savantis offers a full suite of SAP training and education courses, delivered by certified SAP Instructors, Curriculum Designers and Consultants in North America.

Our SAP educational services include project team training, end user training, SAP content development, and post implementation refresher education. Our services are designed to meet your workforce’s learning needs as well as your organization’s unique implementation and business objectives.

We have a

Service for that:

**DELIVER -**  
*Rapid to Value*

SAP Implementation with complete solution offerings in the areas of SAP for retail and wholesale, HANA, Mobility, Netweaver Identity Management, Rental and other point solutions

**ENABLE - Capability**  
Design & Training & Build, Education

**SUPPORT -**  
*Embedded*

through SAP’s world-class AMS, hosting and functional support models

### Competency Based Learning

With Savantis' competency-based approach to SAP Learning, you can customize your SAP training curriculum to meet your company’s and your team’s learning needs - within your budget. We enable you to ‘custom-build’ your SAP curriculum based on the actual competencies and skills your team needs to master.

### Experienced SAP Consultant-Instructors

Our team consists of experienced and certified consultant instructors that have been teaching since 1998. Our consultant instructors deliver SAP training when they are not on projects, assuring they bring recent and invaluable implementation and support experience into the classroom. They continually learn and reaffirm their on-the-job education in SAP business processes and configuration.

## SAP Training Delivery made easy

Unlike our competitors we provide flexibility in scheduling trainings so they fit your schedule and unique needs. What makes us truly unique is our ability to deliver a hands-on, fully functional SAP training environment with little or no hardware or software set-up through our Hosted Labs solution.

And we offer multiple delivery mechanisms (classroom instructor-led, virtual instructor-led, web-based or a blended approach) ensuring your learners learn the skills they need, at the right time, in the right place. Our inclusive training labs approach to teaching strikes the best balance between lecture and 'hands-on' learning. And did we mention we accommodate both large and small group training requests?

## Hands-on based path to SAP Training success

We can all agree that hands-on labs are critical to an effective learning program: proficiency, comprehension and retention depend on it. However, providing such hands-on labs comes with many challenges which all too often send even well-run training programs off-course. With our Hosted Labs solution it doesn't have to be that way.

Savantis automates the entire set-up, delivery, and tear down of an SAP training lab environment – eliminating the most cumbersome technical and administrative functions. You no longer have to put limitations on class enrollment and you can easily accommodate last minute enrollments.

With Hosted Labs you are able to deliver hands-on training classes anywhere, anytime, around the world, while managing the content and processes from one single location. Whether it's for classroom instructor-led or online training. Hosted Labs run without a hitch so our consultant-instructors can focus on raising SAP software proficiency, while reducing your delivery costs.

### Key Benefits

- Flexibility
- Competency based SAP curricula
- Value through customized curricula
- Experienced and Certified Instructors
- Hands-on heavy through Hosted Labs
- Applied learning anytime, anywhere
